GERENCIAMENTO

GERENCIAMENTO DE VÍDEO

LEITURA DE PLACAS

É um módulo inteligente que, utilizando recursos de OCR (Optical Character Recognition) para reconhecimento automático de caracteres

DIGIFORT INSIGHT

é o módulo de captura de tela que é capaz de operar em qualquer computador com o sistema operacional Windows

ANÁLISE AVANÇADA DE VÍDEO

MONITORAMENTO MÓVEL

ANÁLISE FORENSE

O novo módulo BriefCam VIDEO SYNOPSIS® fornece recursos e ferramentas inovadoras para análise forense de vídeo e projetos de vigilância eletrônica.

GESTÃO DE OCORRÊNCIAS

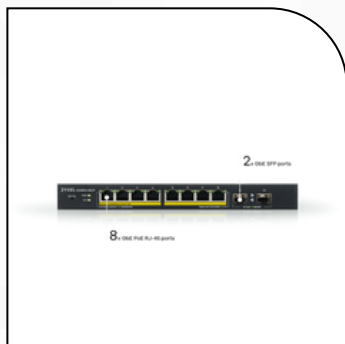

ALARME E AUTOMAÇÃO

Gerenciamento de alarmes e eventos, com reconhecimento de alarmes de qualquer dispositivo com contato seco que esteja ligado nas câmeras ou servidores de vídeo.

CONTROLADORES DE FIBRA ÓPTICA

- ✓ **Fibra óptica desenvolvida para monitoramento perimetral inteligente.**
- ✓ **Tecnologia desenvolvida no Brasil, garantindo alta performance e confiabilidade.**
- ✓ **Suporte técnico especializado e atendimento próximo para auxiliar em todas as etapas do projeto.**
- ✓ **Integração com os principais ecossistemas de segurança eletrônica e infraestrutura.**
- ✓ **Maior potencial de rentabilidade para integradores, revendas e parceiros.**
